

Sunflower Supplies & Suggestions

1. Use construction paper in green, brown, yellow, red, & orange for the sunflower.
2. Create the petals with warm colors.
3. Add more leaves with green construction paper.
4. Display them on your doors or bulletin boards.

Label the parts of the sunflower.

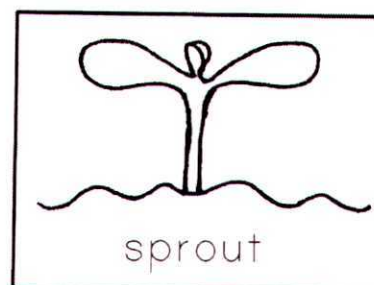

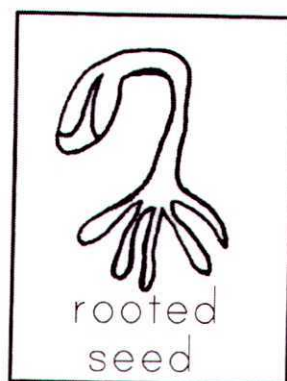

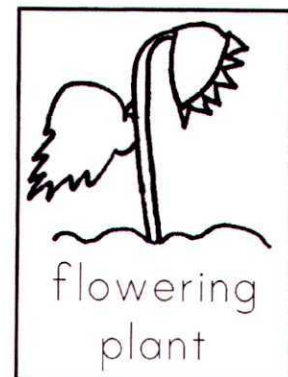

stem

roots

flower

leaf

Cut out and label the sunflower life cycle.

Describe the steps of
photosynthesis.

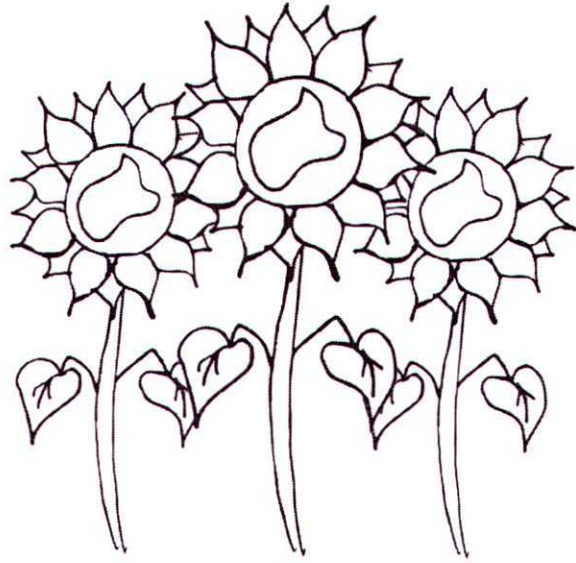

A hand-drawn outline of a leaf, oriented vertically. The leaf has a wavy, irregular border. Inside the outline, there are 15 horizontal lines for writing. The lines are evenly spaced and extend across most of the width of the leaf. On the right side, there is a small stem or petiole extending outwards. The entire drawing is in black ink on a white background.

What are plants used for
other than food?

A large, irregularly shaped area with horizontal lines, resembling a piece of lined paper or a drawing space, intended for writing an answer. The shape is roughly oval with jagged, hand-drawn edges. It contains approximately 15 horizontal lines. The top portion of the shape contains the text "What are plants used for other than food?".

name _____

Sunflower Facts Sheet

Research facts about sunflowers and record them on this sheet.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Write the sunflower facts on each petal of the sunflower. Attach to your sunflower life cycle worksheet.
